SECOND SECTION

Structuring,

Duties,

Authority and Responsibilities

Evaluation

Structuring

ARTICLE 4 -

a) **The Dean** is responsible for the intern education. The duties and responsibilities of the intern medicine period, planning, execution and evaluation of education and other related issues are carried out by the Education Committee of the Faculty of Medicine.

b) **6th Grade Coordinator and Assistant:** They carry out the duties of conducting education in a healthy manner, solving the problems arising by discussing them with the department / science department officers or forwarding the solutions to the Education Commission and the Dean, updating the Inner Education Working Principles.

c) **6th Class Internship Manager:** It is determined by the head of the department where the intern training is made and is responsible to the head of the department. 6. Class internship manager, Education Commission Chair, Family Medicine Period Coordinator and Assistants organize and evaluate their training in accordance with the relevant department's educational objectives in close cooperation with the intern physicians. Identifies problems related to the internship, offers solutions and prepares proposals for the execution of the internship. On the first day, the intern physicians who are new to the internship notify the proficiency document determining the minimum activities that should be done during the internship education by conducting an information meeting including the operation of the department / science branch, working order, job descriptions, visit hours, training meetings and what is expected from the interns physician.

ç) Intern physician is qualified as a doctor under supervision in internships in the annual program approved by the Faculty Board.

Duties, Powers and Responsibilities of Intern Physician

ARTICLE 5 -

a) Internship is the application area of the knowledge and skills acquired by the student throughout the entire medical school education. Each department / department determines the list of skills to be acquired by the student in relation to his / her branch, how many times they will be made and their learning objectives in writing in the 6th grade curriculum and announces them to the intern.

b) Each department / department in which internship education is conducted prepares a Certificate of Proficiency for the students of internship period, taking into consideration the National EAP. With this document, it documents how many times the student has done the relevant skills and whether he has applied them in sufficient quality.

c) Intern physicians attend personally under the supervision and supervision of the assistant, specialist doctor or faculty member responsible for all examination, treatment, clinical practice, care and management of the patient in the service where he / she is in charge from the application to the hospital.

ç) To comply with the conditions of all institutions and organizations where intern physicians are educated, to perform all kinds of health services, to participate in polyclinics, surgery, laboratory work, case reports, conferences, seminars and all other clinical activities under the supervision of a responsible assistant, specialist doctor or faculty member. and he / she has to make appropriate professional practices personally.

d) Intern physicians stay in seizures in units that are kept on duty in accordance with the working order of the clinic they are in. The seizure exercise is carried out similar to that in the daily study. Seizures are for educational purposes. The number and hours of seizures are determined by the relevant department. However, the watch hours cannot be increased in order to close the service gap.

e) Intern physicians are obliged to wear the uniform approved by the clinic during the study and to carry the student ID document on the collar, to comply with the working hours and to meet the attendance requirements.

Evaluation of Intern Physician

ARTICLE 6 - The Proficiency Certificate completed during internship training is approved by the responsible lecturer at the end of the term. Students who fail according to the qualification certificate and those who do not meet the attendance requirements are considered unsuccessful and repeat the work in that unit. The proficiency certificate of the intern physicians is approved by the head of the relevant department / department and sent to the Student Affairs Office.
